Proprietà commutativa delle addizioni

Risolvi le addizioni e controlla il risultato con la proprietà commutativa.

Esempio: $37 + 45 = 45 + 37 = 82$

1. $47 + 23 = \dots$ $\qquad\qquad$ $32 + 54 = \dots$ $\qquad\qquad\qquad$ [70, 86]
2. $48 + 27 = \dots$ $\qquad\qquad$ $39 + 24 = \dots$ $\qquad\qquad\qquad$ [75, 63]
3. $75 + 14 = \dots$ $\qquad\qquad$ $86 + 12 = \dots$ $\qquad\qquad\qquad$ [89, 98]
4. $230 + 27 = \dots$ $\qquad\qquad\qquad$ [257]
5. $125 + 62 = \dots$ $\qquad\qquad\qquad$ [187]
6. $57 + 56 = \dots$ $\qquad\qquad\qquad$ [113]
7. $59 + 45 = \dots$ $\qquad\qquad\qquad$ [104]
8. $128 + 46 = \dots$ $\qquad\qquad\qquad$ [174]
9. $208 + 79 = \dots$ $\qquad\qquad\qquad$ [287]
10. $141 + 64 = \dots$ $\qquad\qquad\qquad$ [205]
11. $21 + 84 = \dots$ $\qquad\qquad\qquad$ [105]
12. $94 + 58 = \dots$ $\qquad\qquad\qquad$ [152]
13. $72 + 74 = \dots$ $\qquad\qquad\qquad$ [146]

Risolvi le addizioni applicando la proprietà associativa.

Esempio: $23 + 45 + 12 = 23 + (45 + 12) = 23 + 57 = 80$

1. $20 + 9 + 34 = \dots$ $\qquad\qquad$ $15 + 5 + 14 = \dots$ $\qquad\qquad$ [63, 34]
2. $27 + 3 + 40 = \dots$ $\qquad\qquad$ $41 + 25 + 5 = \dots$ $\qquad\qquad$ [70, 71]
3. $17 + 13 + 31 = \dots$ $\qquad\qquad$ $14 + 27 + 22 = \dots$ $\qquad\qquad$ [61, 63]
4. $13 + 27 + 48 = \dots$ $\qquad\qquad\qquad$ [88]
5. $31 + 22 + 36 = \dots$ $\qquad\qquad\qquad$ [89]
6. $31 + 19 + 23 = \dots$ $\qquad\qquad\qquad$ [73]
7. $37 + 24 + 20 = \dots$ $\qquad\qquad\qquad$ [81]
8. $14 + 35 + 46 = \dots$ $\qquad\qquad\qquad$ [95]
9. $12 + 18 + 45 = \dots$ $\qquad\qquad\qquad$ [75]
10. $47 + 23 + 14 = \dots$ $\qquad\qquad\qquad$ [84]
11. $25 + 28 + 45 = \dots$ $\qquad\qquad\qquad$ [98]
12. $16 + 25 + 44 = \dots$ $\qquad\qquad\qquad$ [85]
13. $32 + 41 + 23 = \dots$ $\qquad\qquad\qquad$ [96]
